# BINIYAM ABAYNEH

Frontend Web Developer

Secha, Arba Minch, Ethiopia | +251 939 315 186 | biniyamabayneh730@gmail.com

## PROFESSIONAL SUMMARY

Innovative and deadline-driven frontend developer with practical experience designing and building user-centered websites from concept to polished delivery. Proficient in HTML5, CSS3, Bootstrap, JavaScript, and responsive techniques including media queries. Combines solid programming foundations in C++ and Java with a strong sense of visual design. Currently pursuing a Bachelor of Software Engineering at Arba Minch University Institute of Technology.

## TECHNICAL SKILLS

| | |
|---|---|
| **Frontend Development** | HTML5, CSS3, Bootstrap, JavaScript, Responsive Design, Media Queries |
| **Programming Languages** | C++, Java |
| **Design & UX** | User-centered design, UI layout, Artistic digital content design |
| **Practices** | Cross-browser compatibility, Progressive enhancement, Clean code structure |

## PROJECT EXPERIENCE

### Apple Website Rebuild

*Frontend Personal Project | HTML, CSS, Bootstrap, JavaScript | 2025 – Present*

- Rebuilt a fully responsive recreation of the Apple website with focus on visual fidelity and modern layout practices.
- Applied media queries and Bootstrap grid system to deliver consistent experiences across desktop, tablet, and mobile devices.
- Prioritized clean, maintainable code structure and smooth user interactions.

### Addis Ababa Housing Registration and Transfer System

*Academic / Personal Project | Java | 2025*

- Designed and developed a system supporting housing registration and ownership transfer processes.
- Applied object-oriented programming principles to model real-world workflows and data relationships.

### Matching Card Game

*Personal Project | C++ | 2025*

- Built an interactive matching card game demonstrating logic, data structures, and state management.
- Strengthened problem-solving skills and understanding of interactive application design.

### Additional Frontend Projects

*HTML, CSS, Bootstrap, JavaScript | 2025 – Present*

- Developed multiple websites and landing pages with emphasis on responsive design and user-centered interfaces.

## EDUCATION

### Bachelor of Software Engineering

*Arba Minch University Institute of Technology | 2024 – Present*

Focusing on software design principles, programming, frontend development, and artistic design of digital content.

## ADDITIONAL INFORMATION

- Strong interest in modern frontend technologies and continuous learning of new frameworks and tools.
- Combines technical programming skills with artistic sensibility to create visually appealing digital products.
- Languages: Amharic (Native), English (Professional working proficiency).
- Open to remote and on-site frontend development opportunities.
